

Fundamentals of Energy Regulation

Jonathan A. Lesser, Ph.D.

Leonardo R. Giacchino, Ph.D.

Table of Contents

Part I: Principles

Chapter 1: A Brief History

Introduction

Chapter 2: Economic Concepts of Regulation

Introduction

The Fundamental Economic Goal of Regulation

The Competitive Ideal

Factors that Preclude a Competitive Outcome

Profit Maximization Under Monopoly

The Contestability of Markets

The Regulator's Pricing Challenge

Other Complicating Factors

How Deregulation Can Lead to More Regulation

Chapter Summary

Chapter 3: The Role of the Revenue Requirement

Introduction

Meeting the Regulatory Challenge

Key Regulatory Principles

Why Revenue Requirements Underlie All Regulatory Schemes

Revenue Requirement Components

Depreciation

Taxes

Return on Capital Assets

Other Issues

Chapter Summary

Chapter 4: Alternative Regulatory Structures

Introduction

Common Aspects of Regulatory Structures

Cost Differences and Operating Environments

Cost of Service

Performance-Based Regulation

Yardstick Competition

Comparing Different Regulatory Regimes to Set Tariffs

Chapter Summary

Chapter 5: Cost Measurement

Introduction

Why Regulators Measure Costs

Estimating and Regulating Operating Cost

Estimating and Regulating the Rate Base

Deferred Costs and Regulatory Assets

Chapter Summary

Appendix: Depreciation Mechanics

Chapter 6: Cost Allocation

Introduction

Cost Functionalization

Cost Classification

Cost Allocation

Chapter Summary

Chapter 7: Rate Setting Principles and Procedures

Introduction

Billing Determinants

Tariff Design

Alternative Design Structures

Tariff Setting Methods

Pricing and Social Policy

Electric Restructuring and Default Service

Chapter Summary

Chapter 8: Rate and Tariff Adjustment Mechanisms

Introduction

Pass-Through Mechanisms

Inflation Adjustments

An Alphabet Soup of Adjustment Factors

Shared-Savings and Off-Ramps

Chapter Summary

Chapter 9: Market Power in the Electric and Natural Gas Industries

Introduction

Defining Market Power

Dominant Firms

Horizontal and Vertical Market Power

Remedies for Market Power

Withholding of Generation Resources

The Essential Facilities Doctrine

Chapter Summary

Part II: Extensions and Applications

Chapter 10: Dealing With Uncertainty

Introduction

Key Issues

Making Investment Decisions Under Uncertainty

Measuring Price Volatility

Market and Nonmarket Uncertainties

Chapter Summary

Chapter 11: Environmental Regulation of the Energy Industry

Introduction

Environmental Costs and Environmental Externalities

Regulatory Responses

Measuring Environmental Costs and Benefits

Environmental Costs and Energy Prices

Externality Adders

Current Regulatory Policies: Renewable Energy and Global Climate Change

Chapter Summary

Chapter 12: Regulating the Electric System Reliability

Introduction

Direct Current Circuits

Alternating Current Circuits

Defining Reliability

Reliability and Installed Capacity Markets

International Capacity Markets

Chapter Summary

Chapter 13: Regulation and Reform in International Markets

Introduction

Transition Mechanisms

Alternative Privatization Arrangements

Establishing the Regulatory Framework

Renegotiation and Change

International Arbitration

Chapter Summary

Chapter 14: The Future of Economic Regulation in the Electric and Natural Gas Industries

Introduction

The Regulatory Clash of Politics and Economics

The Future of U.S. Regulation

Concluding Thoughts
