

# Table of Contents

<b>Preface to the Third Edition</b> .....	xiv
<b>Part 1: Principles</b> .....	1
Chapter 1: A Brief History of Electric and Natural Gas Regulation .....	5
1.1 Introduction .....	5
Chapter 2: Economic Concepts of Regulation .....	21
2.1 Introduction .....	21
2.2 The Fundamental Economic Goal of Regulation .....	22
2.3 The Competitive Ideal .....	24
2.4 Factors that Preclude a Competitive Outcome .....	28
2.5 Profit Maximization Under Monopoly .....	32
2.6 The Contestability of Markets .....	34
2.7 The Regulator's Pricing Challenge .....	37
2.8 Other Complicating Factors .....	40
2.9 How Deregulation Can Lead to More Regulation .....	43
2.10 Chapter Summary .....	46
Chapter 3: The Role of the Revenue Requirement .....	47
3.1 Introduction .....	47
3.2 Meeting the Regulatory Challenge .....	48
3.3 Key Regulatory Principles .....	50
3.4 Why Revenue Requirements Underlie All Regulatory Structures .....	59
3.5 Revenue Requirement Components .....	65
3.6 Other Issues .....	72
3.7 Chapter Summary .....	74
Chapter 4: Regulatory Accounting .....	75
4.1 Introduction .....	75
4.2 The Three—or Four—Sets of Books .....	76
4.3 Usefulness of Regulatory Accounting .....	78
4.4 Regulatory Accounting Standards .....	80
4.5 Separating Regulated and Unregulated Activities .....	86
4.6 Presentation of Regulatory and Financial Accounting Information .....	89
4.7 Setting up a Regulatory Accounting System .....	91
4.8 Chapter Summary .....	94
Chapter 5: Alternative Regulatory Structures .....	95
5.1 Introduction .....	95
5.2 Common Aspects of Regulatory Structures .....	96
5.3 Cost Differences and Operating Environments .....	97
5.4 Cost of Service Regulation .....	98
5.5 Performance-Based Regulation .....	102

5.6	Yardstick Competition .....	113
5.7	Comparing Different Regulatory Regimes to Set Tariffs.....	117
5.8	Chapter Summary .....	119
	Appendix 5-1: Model Company Analysis .....	120
Chapter 6:	Cost Measurement .....	127
6.1	Introduction .....	127
6.2	Why Regulators Measure Costs .....	127
6.3	Estimating and Regulating Operating Costs .....	131
6.4	Estimating and Regulating the Rate Base .....	147
6.5	Estimating the Regulated Rate of Return .....	157
6.6	Deferred Costs and Regulatory Assets .....	163
6.7	Chapter Summary .....	169
	Appendix 6-1: Depreciation Mechanics.....	170
	Appendix 6-2: Using Lead-Lag Studies to Calculate Working Capital .....	180
	Appendix 6-3: Estimating Working Capital for the Tariff Period .....	184
Chapter 7:	Cost Allocation .....	191
7.1	Introduction .....	191
7.2	Cost Functionalization .....	192
7.3	Cost Classification .....	195
7.4	Cost Allocation.....	197
7.5	Allocation Practices .....	207
7.6	Chapter Summary .....	213
Chapter 8:	Rate-Setting Principles and Procedures.....	215
8.1	Introduction .....	215
8.2	Billing Determinants.....	216
8.3	Tariff Design .....	228
8.4	Alternative Design Structures.....	230
8.5	Tariff-Setting Methods.....	237
8.6	Incremental and Rolled-In Methods .....	260
8.7	Pricing and Social Policy .....	266
8.8	Electric Restructuring and Default Service.....	267
8.9	Chapter Summary .....	271
	Appendix 8-1: Estimation Issues in Forecasting Energy Demand .....	272
	Appendix 8-2: Ramsey Pricing Formula .....	274
	Appendix 8-3: Mcf-Mile (Volume-Distance) Tariff Method in Natural Gas .....	276
	Appendix 8-4: Zone Gate Tariff Method in Natural Gas .....	290
	Appendix 8-5: Incremental or Rolled-In: .....	293
Chapter 9:	Rate and Tariff Adjustment Mechanisms.....	299
9.1	Introduction .....	299
9.2	Pass-Through Mechanisms .....	299

9.3 Inflation Adjustments .....	301
9.4 An Alphabet Soup of Adjustment Factors .....	308
9.5 Decoupling .....	323
9.6 Off-Ramps, Re-Openers and Shared Savings .....	325
9.7 Chapter Summary .....	328
Appendix 9-1: The Inflation Adjustment Formula .....	329
Appendix 9-2: Level Based Methods: DEA Approach to Measure Efficiency	331
Appendix 9-3: TFP Derivation .....	332
Appendix 9-4: TFP Calculation Methodologies .....	333
Chapter 10: Pricing and Services Regimes .....	339
10.1 Introduction .....	339
10.2 Customer Types .....	339
10.3 The Tariff .....	340
10.4 Other Charging Policies .....	346
10.5 Electric Industry Restructuring and Retail Competition .....	360
10.6 Chapter Summary .....	363
Chapter 11: Regulatory Agency Performance and Objectives .....	365
11.1 Introduction .....	365
11.2 Foundations of Regulatory Commitment .....	365
11.3 Objectives of the Regulator .....	372
11.4 Building Credibility .....	373
11.5 Compliance Mechanisms .....	381
11.6 Chapter Summary .....	393
Chapter 12: Mechanics of a Tariff Review Process .....	395
12.1 Introduction .....	395
12.2 A Multi-Stage Process .....	395
12.4 Presentations and Submissions Stage .....	402
12.5 Decision and Negotiation Stage .....	412
12.6 Announcement and Implementation Stage .....	413
12.7 Chapter Summary .....	417
<b>Part II: Extensions and Applications .....</b>	<b>419</b>
Chapter 13: Setting the Rate of Return .....	421
13.1 Introduction .....	421
13.2 The Efficient Market Hypothesis .....	422
13.3 Estimation Methodologies .....	423
13.4 Book vs. Market Capitalization .....	446
13.5 Incentive Returns and Return Adjustments .....	449
13.6 Impact of the Financial Crisis in U.S. Estimates .....	451
13.7 Chapter Summary .....	452
Appendix 13-1: Estimating Betas .....	453

Appendix 13-2: Adjusting Betas .....	454
Appendix 13-3: The Geometric Mean .....	458
Appendix 13-4: Country Risk Methodologies .....	460
Chapter 14: Energy Market Structure and Market Power .....	465
14.1 Introduction .....	465
14.2 Structure of Energy Markets and the Competitive Outcome .....	467
14.3 Defining Market Power .....	478
14.4 Dominant Firms .....	482
14.5 Horizontal and Vertical Market Power .....	483
14.6 Remedies for Market Power .....	489
14.7 Market-Based Rates .....	492
14.8 Market Manipulation .....	497
14.9 The Essential Facilities Doctrine .....	501
14.10..... Chapter Summary	502
Appendix 14-1: Levelized Cost of Energy .....	504
Appendix 14-2: Short- and Long-Run Impacts of Government Subsidized Entry on Capacity Markets .....	511
Chapter 15: Dealing with Uncertainty .....	513
15.1 Introduction .....	513
15.2 Key Issues .....	514
15.3 Making Investment Decisions Under Uncertainty .....	515
15.4 Measuring Price Volatility .....	528
15.5 Non-Market Uncertainties .....	531
15.6 Chapter Summary .....	534
Chapter 16: Financial and Physical Risk Management .....	535
16.1 Introduction .....	535
16.2 Financial Risk Management: Hedging .....	536
16.3 Physical Risk Management .....	540
16.4 Chapter Summary .....	547
Chapter 17: Environmental Regulation of the Energy Industry .....	549
17.1 Introduction .....	549
17.2 Environmental Costs and Environmental Externalities .....	550
17.3 Regulatory Responses .....	553
17.4 Measuring Environmental Costs and Benefits .....	560
17.5 Environmental Costs and Energy Prices .....	563
17.6 Externality Adders .....	565
17.7 Current Regulatory Policies: Renewable Energy and Global Climate Change	567
17.8 Chapter Summary .....	580
Chapter 18: Electricity Markets and Electric System Reliability .....	581
18.1 Introduction .....	581

---

18.2 Direct Current Circuits .....	582
18.3 Alternating Current Circuits .....	586
18.4 Defining Reliability .....	587
18.5 Reliability and Installed Capacity Markets .....	603
18.6 Capacity Markets Across the World .....	609
18.7 Chapter Summary .....	613
Chapter 19: Regulation and Reform in International Markets .....	615
19.1 Introduction .....	615
19.2 Transition Mechanisms .....	616
19.3 Alternative Privatization Arrangements .....	617
19.4 Establishing the Regulatory Framework .....	622
19.5 Renegotiation and Change .....	625
19.6 International Arbitration .....	627
19.7 Eminent Domain, Expropriation, and Regulatory Takings .....	629
19.8 Use of Regulatory Assets Accounting in Response to Regulatory Takings	633
19.9 Chapter Summary .....	635
Select Bibliography .....	636
U.S. Cases and Proceedings .....	652
International Sources and Cases .....	659
Index .....	662
